Henry's work is based on the belief that coastal communities are uniquely vulnerable to the effects of climate change, but that they also have the potential to be leaders in adaptation and resilience. She believes that by working together, these communities can create a more sustainable and equitable future for themselves.

Henry's work with Tomorrow's Waves has been recognized by a number of organizations, including the United Nations Environment Programme, the World Bank, and the Rockefeller Foundation. She has also been featured

in a number of media outlets, including The New York Times, The Washington Post, and National Geographic.

In this interview, Henry discusses her work with Tomorrow's Waves, her vision for the future of coastal communities, and the challenges that these communities face.

****Q: What inspired you to found Tomorrow's Waves?***

****A:**** I was inspired to found Tomorrow's Waves after witnessing the devastating impacts of Hurricane Sandy on coastal communities in New York and New Jersey. I saw firsthand how these communities were struggling to recover, and I realized that they needed more support to adapt to the challenges of climate change.

****Q: What is the mission of Tomorrow's Waves?***

****A:**** The mission of Tomorrow's Waves is to empower coastal communities to adapt to the challenges of climate change. We do this by providing these communities with the resources and support they need to develop and implement adaptation plans, and by advocating for policies that support coastal resilience.

****Q: What are some of the challenges that coastal communities face?***

****A:**** Coastal communities face a number of challenges, including sea level rise, flooding, erosion, and storms. These challenges are exacerbated by climate change, which is making them more frequent and severe.

****Q:** How can coastal communities adapt to the challenges of climate change?

****A:**** Coastal communities can adapt to the challenges of climate change by developing and implementing adaptation plans. These plans should include a variety of measures, such as building seawalls, restoring wetlands, and relocating infrastructure.

****Q:** What is your vision for the future of coastal communities?

****A:**** I envision a future where coastal communities are resilient and thriving, despite the challenges of climate change. I believe that by working together, these communities can create a more sustainable and equitable future for themselves.
